

The drawing consists of two parts: a profile view at the top and a plan view below it. The profile view shows the road's elevation with various levels marked: +1.000, +1.007, +1.110, +0.990, +1.000, +1.043, +1.071, +1.060, +1.001, +1.010, +1.110, +1.000, +1.009, +1.070, and +1.070. It also shows a dashed line for the proposed grade and a solid line for the existing ground. The plan view shows the road's alignment with stationing markers: 389.4125 and 417.75. The road is shown as a hatched area, and the surrounding ground is shown as a solid area. The drawing is a technical representation of a road cross-section, likely for a civil engineering project.

[illegible]
